

Environmental conservation
results for fiscal 2008

Activities of Domestic Subsidiary Companies

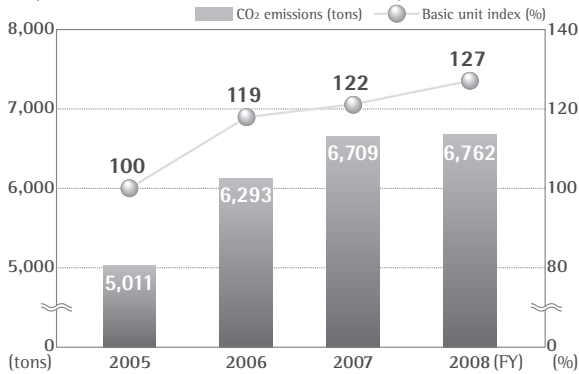

Our domestic subsidiaries share our basic stance on the environment, and are implementing measures to reduce their environmental loads. Here we report on the environmental load achievements of Kanazu Mfg. Co., Ltd. (motorcycle parts processing and assembly), Keihin Sogyo Co., Ltd. (motorcycle carburetor assembly), Nasu Seiki Mfg. Co., Ltd. (motorcycle and automobile parts processing), Keihin Watari Co., Ltd. (production of functional components for automobiles), and Keihin Valve Corp. (production of industrial valves).

Domestic Subsidiary Companies

CO₂ emissions volume

The volume of CO₂ emissions for domestic subsidiaries in fiscal 2008 remained mostly unchanged, but the basic unit level increased by five points over the previous fiscal year. This is due, in part, to a downturn in the capacity utilization ratios associated with production fluctuations.

● CO₂ emissions and basic unit index (index set at 100 for fiscal 2005)

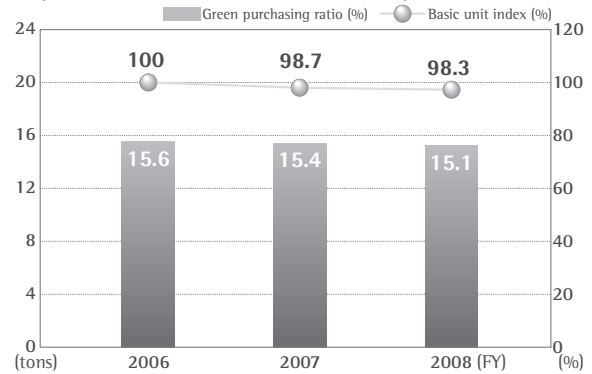

Green purchasing ratio

Implemented since Fiscal 2006, the green purchasing ratio for domestic subsidiaries in fiscal 2008 was 98.3%, securing a level approximately equivalent to that of fiscal 2007.

Green purchasing mainly applies to office supplies.

● Green purchasing ratio and basic unit index (index set at 100 for fiscal 2006)

Waste disposal volume

The volume of waste disposal for domestic subsidiaries in fiscal 2008 was 261 tons, which is a 20-ton increase over the previous fiscal year. This is due to production fluctuations.

● Waste disposal volume and waste disposal basic unit index (index set at 100 for fiscal 2005)
